

Gas oven

Special features

Keep Warm

Keep cooked food warm at a low temperature for up to 3 hours.

1. Place the container with the food on a rack, and then close the door.
2. Press **Keep Warm**.
3. Press **START/SET**. The oven heats up to 175 °F (80 °C).

NOTE

- You can cancel warming at any time by pressing **OFF/CLEAR**.
- To set the warming function during a timed cooking, press **Keep Warm** in timed cooking mode. When the timed cooking is complete, the oven will lower the temperature to the warming default, and keep that temperature until the warming finishes or is canceled.

Bread Proof

The Bread Proof function automatically provides the optimum temperature for the bread proof process, and therefore does not have a temperature adjustment. If you press Bread Proof when the oven temperature is above 100 °F, Hot will appear in the display. Because this function produces the best results when started while the oven is cool, we recommend that you wait until the oven has cooled down and Hot disappears from the display.

1. Press **Bread Proof**.
2. Press **START/SET**.
3. Press **OFF/CLEAR** at any time to turn off the Bread Proof function.

NOTE

Use rack position 3 for bread proofing.

CAUTION

- Do not use Bread Proof when the oven temperature is above 125 °F. If the temperature is above 125 °F, this mode will not heat the oven to the optimal temperature. Wait until the oven cools down.
- Do not use Bread Proof for warming food. The proofing temperature is not hot enough to keep food warm.
- Place the dough in a heat-safe container on rack position 3 or 4 and cover it with a cloth or with plastic wrap. You may need to anchor the plastic wrap underneath the container so that the oven does not blow it off the dough.
- To avoid lowering the temperature and extending proofing time, do not open the oven door.

The Sabbath Option

(For use on the Jewish Sabbath and Holidays)

Use this option only for baking on the Jewish Sabbath and Holidays. For more information, visit the website at <http://www.star-k.org>

With the Sabbath option

- The oven temperature can be set higher or lower after you have set this option.
- The display doesn't change and the oven will not beep when you change the temperature.
- Once the oven is properly set for baking with the Sabbath option active, the oven will remain continuously on until the Sabbath feature is cancelled. This will override the factory preset 12 hour energy saving feature.
- If the oven light is needed during the Sabbath, press  before activating the Sabbath feature. Once the oven light is turned on and the Sabbath option is active, the oven light will remain on until the Sabbath option is turned off.
- If you want the oven light off, be sure to turn it off before activating the Sabbath feature.
- Do not use the surface cooktop when the Sabbath option is on.

To enable the Sabbath option

1. Press **Bake**.
2. Enter a desired temperature using the number pad. The default temperature is 350 °F.
3. Press **START/SET**. The display temperature changes after the oven temperature reaches 175 °F.

4. Press **Bake** and **Number 1** simultaneously for 3 seconds to display "SAb". Once "SAb" appears, the oven control no longer beeps or displays any further changes.

NOTE

- You can change the oven temperature once baking starts, but the display will not change or beep. After changing the temperature, it takes 15 seconds before the oven recognizes the change.
- You can turn off the oven at any time by pressing **OFF/CLEAR**. However, this doesn't deactivate the Sabbath option.
- To deactivate the Sabbath option, hold down **Bake** and **Number 1** simultaneously for 3 seconds.
- You can set the cooking time before activating the Sabbath option.
- After a power failure, the oven will not resume operation automatically. "SAb" will appear in the control panel, but the oven will not turn back on. Food can be safely removed from the oven, but you should not turn off the Sabbath option and turn the oven back on until after the Sabbath/Holidays.
- After the Sabbath observance, turn off the Sabbath option by pressing and holding **Bake** and **Number 1** simultaneously for at least 3 seconds.

CAUTION

- Do not attempt to activate any other functions except for Bake when the Sabbath option is on. Only the following pads will function properly: Number pads, Bake, Oven Start/Set, and Oven Off.
- Do not open the oven door or change the oven temperature for about 30 minutes after you have started the Sabbath option. Let the oven reach the set temperature. The oven fan operates only when the oven temperature increases.
